

# Contact Davey Resource Group:

Objective: To provide a municipality the ability to manage their tree population.

More information is available at <http://www.treekeeperonline.com>

- A fully working demonstration site
- More in depth information on TreeKeeper 7.4 deployment methods and add-ons
- A Power Point presentation filled with information, including some samples of how TreeKeeper 7.4 functions

Over ten years of experience creating tree management software.

Davey Resource Group has been involved in over 200 inventory projects.

International presence – DRG is an industry leader, supported by Davey Tree Expert Company

Software is flexible, powerful, and easy to use. In order to meet your needs, tree experts guide the design process of the software.

Staff at DRG includes software developers, computer programmers, GPS technicians, and GIS applications personnel, as well as foresters, agronomists, arborists, botanists, entomologists, lab and diagnostic technicians, and plant pathologists.

Species	Condition	COUNT	Percentage(%)
Acer rubrum	Excellent	1	.25
Acer saccharinum	Dead	59	14.57
Acer saccharinum	Fair	23	5.68
Acer saccharinum	Good	22	5.43
Acer saccharinum	Poor	4	.99
Acer saccharum	Good	3	

TreeKeeper 7.4 was designed to:

- ✓ Manage Tree Inventories effectively
- ✓ Manage the calls one receives from the residents of a community
- ✓ Manage the Work Orders created internally and from calls received.
- ✓ Create Flexible Reports for all data available

TreeKeeper 7.4 is Davey Resource Group's latest Tree Management Software release. It continues the TreeKeeper product line that has been successfully leading our industry for 10 years.

### Tree Valuation Report

(This tree value shown in this report is not intended nor should it be used as a sub appraisal by a qualified arborist)

Botanical Name	Common Name	Species Rating	DBH	Basic Cost	Adjusted Value	Condition	Appraised Value
<a href="#">Acer Red Sunset</a>	Maple, Red Sunset	50%	5	\$ 351.08	\$ 175.54	75%	\$ 92.16
<a href="#">Acer Red Sunset</a>	Maple, Red Sunset	50%	33	\$ 26,445.80	\$ 13,222.90	75%	\$ 6,942.02
<a href="#">Acer Red Sunset</a>	Maple, Red Sunset	50%	27	\$ 18,035.56	\$ 9,017.78	75%	\$ 4,734.33
<a href="#">Acer Red Sunset</a>	Maple, Red Sunset	50%	5	\$ 351.08	\$ 175.54	75%	\$ 92.16
<a href="#">Acer Red Sunset</a>	Maple, Red Sunset	50%	5	\$ 351.08	\$ 175.54	75%	\$ 92.16
<a href="#">Acer saccharinum</a>	Maple, Silver	50%	27	\$ 18,035.56	\$ 9,017.78	50%	\$ 3,156.22
<a href="#">Acer Red Sunset</a>	Maple, Red Sunset	50%	27	\$ 18,035.56	\$ 9,017.78	50%	\$ 3,156.22
<b>Total Appraised Value</b>							<b>\$ 18,265.28</b>

TreeKeeper 7.4 operates in 3 different environments:

- 1) TreeKeeper Subscription (Internet)
- 2) TreeKeeper Standalone (Desktop)
- 3) TreeKeeper Network (Intranet)

Davey Resource Group also offers a full day of on-site training, which can save you money! Ask your project developer for more information.

This material has been prepared and distributed by the Davey Resource Group, a division of Davey Tree Expert Company.

# 10 Benefits to TreeKeeper 7.4:

## 1. Cost efficiency:

TreeKeeper will assist urban foresters in planning their work. Users can build work orders or create forms for contractor bids.

## 2. Knowledge is power:

TreeKeeper presents the urban forester with numerous advantages. Some examples of information that can be gathered: find all trees in poor condition, or determine how much money was spent on hazard reduction prunes in the past 6 months. With TreeKeeper 7.4 this information is easily accessible.

## 3. Better customer service:

When Mrs. Potter calls to report a low hanging limb, the urban forester can easily pull up a site report for that property, and issue any work records for the tree with her on the phone! Imagine her surprise when you say: "Yes, I see you have two red maples in front of your house, one with 12-inch diameter, the other with 26-inch. Which one needs attention?"

## 4. Its good for the trees:

TreeKeeper 7.4 allows the urban forester to set up a 7-year trim cycle, insuring that all trees are cared for regularly. This means huge potential cost savings and more importantly, a healthy urban forest.

## 5. Be Proactive, not Reactive:

Take care of problems before they happen. With TreeKeeper 7.4, quickly locate trees growing under utility lines, and take appropriate action before its too late.

## 6. Budget effectively:

Demonstrate to tree boards and management the importance of increasing the urban forestry budget. Simply use the Tree Valuation Report, which is based on the 9th edition of the ISA Guide for Plant Appraisal, to calculate the worth of the urban forest.

## 7. Accurate Mapping:

With TreeKeeper's add-ons (FKO GIS Browser or the ArcView® Extension), you can easily map the trees in your inventory. If Davey Resource Group does the inventory maps will have sub-meter accuracy. GIS departments will love the new information, and how easily it can be integrated with their current system.

## 8. Access Data in the Field:

You can also import the data from TreeKeeper into a Palm® OS enabled device, with the Palm® Tree Collector add-on. This allows you to update the tree inventory in the field, while you are with the tree. It doesn't get easier than that!

## 9. Get up to date:

Don't let Windows XP get you down! DRG's IT department is able to convert many older databases, such as TK5, TK jr., TK6, Tree Manager® for DOS, or Canopy® for DOS, directly into TreeKeeper 7! Due to TreeKeeper's Internet foundation, TK7 will be around for years to come.

## 10. Flexibility:

Not only can TreeKeeper track trees, it can track many other infrastructures, such as Signs, Fire Hydrants, and Utility Poles. Davey Resource Group uses TreeKeeper 7 to track technical support agreements and service calls! The sky is the limit with TreeKeeper!

# TreeKeeper 7.4 Add-Ons:

## TK7 GIS Browser:

### Purpose:

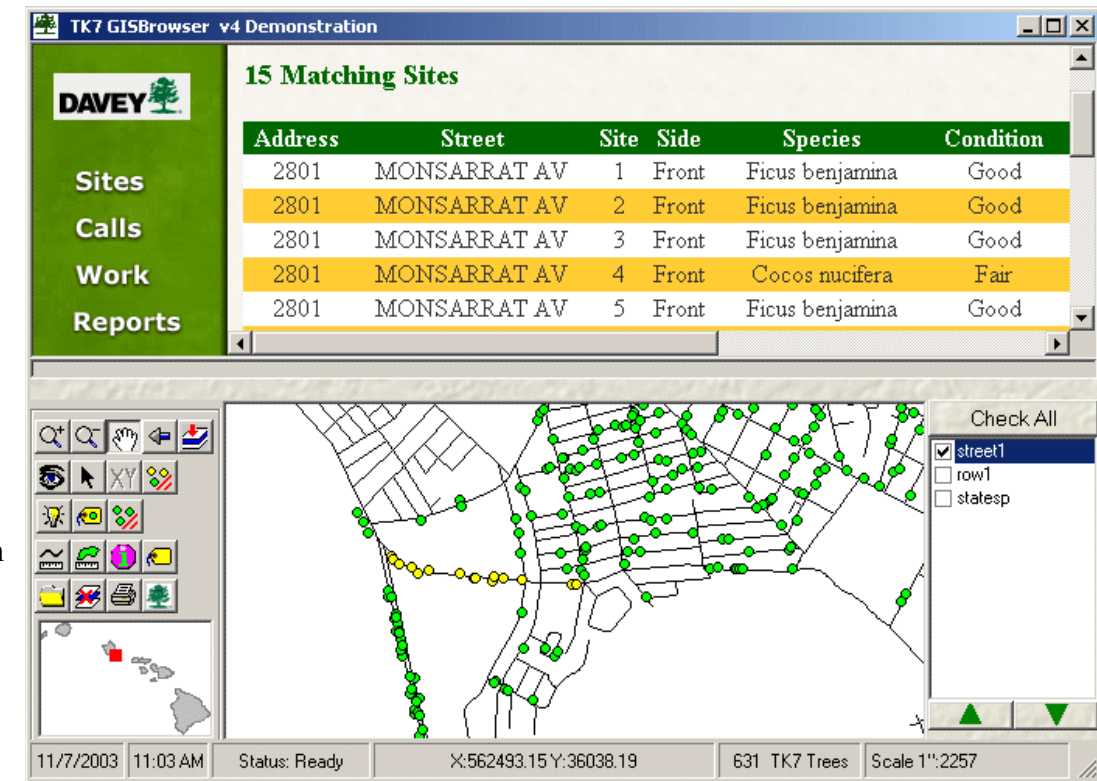

Integrates TreeKeeper 7 with a mapping system.

### How it Works:

This software replaces the standard browser as the method for accessing TK7.

The top half has all the functionality of TK7, while the bottom half displays the TK7 geographic information on top of locally stored base maps.

The user is able to print these maps out in order to easily find the necessary trees.

In the image above, the green dots represent the trees, and the yellow dots represent the trees that matched the user's search criteria.

## Palm Tree Collector:

### Purpose:

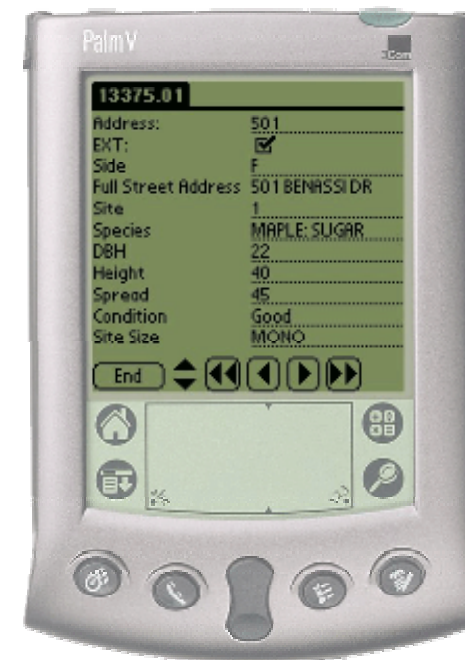

Integrates TreeKeeper 7 with Palm OS enabled devices.

### How it Works:

Users have the ability to download TK7 data into a Palm OS Enabled device. The user can then take this palm into the field and update tree attributes or add new tree sites to the TK7 database.

The user then brings the updated data back to the office, runs it through a middleware program and uploads the new data to TK7.

Displayed here is the update screen of the palm collector. The sugar maple shown here was downloaded from TK7 and can now be edited.
