

TURN-KEY DOUBLE WOOD MANAGEMENT AND MITIGATION

Davey Resource Group has over ten years proven project management experience with Two-Wood mitigation and 3rd Party Transfer, where DRG serves as the **COMMON CONTRACTOR** managing all transfers, permits, pole removal, site restoration & NJUNS / SPANS ticket close-out. Our teams remove approximately 20,000 poles per year and transfer the associated facilities, helping to reduce pole owner liability.

DRG is continually improving its business model in an effort to help not only the Electric Utility (pole owner) but also the Attaching Company by providing accurate schedule & budgeting forecasts. Double Wood is quickly becoming a major reliability issue with nearly every U.S. electric company and has caused the Public Service Commissions in many states to target both delinquent pole owners and ILEC/CLEC companies with double wood issues.

OUR SERVICES

- » **3rd Party Transfer Agreements.** DRG currently has vendor agreements and transfer agreements with most U.S. ILEC and CLECs. We meet with each company to ensure we obtain the correct material and hardware and ensure all transfers are in compliance. NESC Violations will be brought to the attention of the pole owner's Standards & Construction department for further direction. Pictures and detailed information are also provided.
- » **Stub Pole Removal.** All stub poles are pre-audited to confirm "simple" vs "complex", truck access, type of reject pole (if known). DRG manages all "locates", safe transfer and manages all site restoration upon completion.
- » **Risers and Devices in Need of Transfer.** Conditions where transfers will be made complex are duly noted and managed for follow up visit.
- » **Pole Disposal and Site Restoration.** Poles are safely removed and transported to pole owner facility and the job site is restored per standards and all MUNI requirements.
- » **Work Order Close-out.** Finally, DRG will manage the close-out of each NJUNS or SPANS ticket, update the pole owner's GIS and host all data on a secure Web portal customized to that utilities requirements.
